

Innovative Electronics for a changing world

Manual

DC-DC switch mode **step UP** converter

Used to power electronic equipment with a constant voltage from a lower input voltage

Pulse by pulse output current limit circuitry, short circuit protection

Led indication for power out ok and current limit led

Non isolated dc-dc step up converter.

Input voltage: 0 – 36Vdc

Output voltage: Adjustable to 35Vdc OUTPUT @ 4 Amps continuous

Used for (12V to 24V output step up) or (24V to 30V output step up)

Physical: (L) = 75mm (W) = 75mm (H) = 30mm
